Presented: August 1, 2000, Teaching Session, Annual Meeting, Mycological Society of America

ABSTRACT

The poster session is a great learning tool for mycology courses. Students can learn more in depth about a particular topic, and in addition they can learn something about other students' chosen topics. We hold a poster session much like the one you are attending right now. I am presenting some of the best posters from each of my classes (Mycology, Medical Mycology and Plant-Microbe Interactions) to show the quality and scope of the posters. On this poster I present the details of the logistics of holding a poster session and how posters are evaluated for grades.

Key words: Teaching, posters, fungi, mycology.
